

Health Behaviors of Adults: United States, 1999–2001
Series 10, No. 219
Companion tables: Unadjusted percents and population estimates
INTERNET RELEASE ONLY

“Health Behaviors of Adults: United States, 1999–2001,” published by the Centers for Disease Control and Prevention’s National Center for Health Statistics in February 2004, contains 18 tables showing selected measures of health behaviors among U.S. adults, including alcohol use, cigarette smoking, leisure-time physical activity, and body weight status. Each table in the published report presents crude total and age-specific rates for the entire population and for men and women separately. All other statistics included in the published tables were age adjusted to the 2000 U.S. standard population (formerly referred to as the 2000 projected U.S. population).

The following 18 tables are designed as companions to the published tables. They provide the crude (unadjusted) estimates for each of the published tables. A subtitle on each table identifies them as “INTERNET RELEASE ONLY.” Together with the population table ([table X](#)), they can be used to estimate actual number and percent of persons in the various health behavior categories, but they should not be used for analysis of differences between subgroups except insofar as variations in age composition of the groups are considered. The population totals provided in [table X](#) are average annual population estimates covering the period 1999–2001.

The tables are:

[Table 3.1.](#) Percent distributions of lifetime alcohol drinking status for adults 18 years of age and over, by selected characteristics: United States, average annual, 1999–2001. [CRUDE (unadjusted) estimates with age-adjusted totals. Companion to Series 10, No. 219. INTERNET RELEASE ONLY.]

[Table 3.2.](#) Percent distributions of current alcohol drinking status for adults 18 years of age and over, by selected characteristics: United States, average annual, 1999–2001. [CRUDE (unadjusted) estimates with age-adjusted totals. Companion to Series 10, No. 219. INTERNET RELEASE ONLY.]

[Table 3.3.](#) Percent of adults 18 years of age and over who had 5 or more drinks in 1 day at least once in the past year, and percent of adults 18 years of age and over who had 5 or more drinks in 1 day on at least 12 days in the past year, by selected characteristics: United States, average annual, 1999–2001. [CRUDE (unadjusted) estimates with age-adjusted totals. Companion to Series 10, No. 219. INTERNET RELEASE ONLY.]

[Table 3.4.](#) Percent of current drinkers 18 years of age and over who had 5 or more drinks in 1 day at least once in the past year, and percent of current drinkers 18 years of age and over who had 5 or more drinks in 1 day on at least 12 days in the past year, by selected characteristics: United States, average annual, 1999–2001. [CRUDE (unadjusted) estimates with age-adjusted totals. Companion to Series 10, No. 219. INTERNET RELEASE ONLY.]

[Table 4.1.](#) Percent distributions of lifetime cigarette smoking status for adults 18 years of age and over, by selected characteristics: United States, average annual, 1999–2001. [CRUDE (unadjusted) estimates with age-adjusted totals. Companion to Series 10, No. 219. INTERNET RELEASE ONLY.]

[Table 4.2.](#) Percent distributions of current cigarette smoking status for adults 18 years of age and over, and mean number of cigarettes smoked in a day among current smokers 18 years of age and over, by selected characteristics: United States, average annual, 1999–2001. [CRUDE (unadjusted) estimates with age-adjusted totals. Companion to Series 10, No. 219. INTERNET RELEASE ONLY.]

[Table 4.3.](#) Percent distributions of usual number of cigarettes smoked in a day among all current cigarette smokers 18 years of age and over, by selected characteristics: United States, average annual, 1999–2001. [CRUDE (unadjusted) estimates with age-adjusted totals. Companion to Series 10, No. 219. INTERNET RELEASE ONLY.]

[Table 4.4.](#) Percent distributions of age of smoking initiation among current cigarette smokers 18 years of age and over: United States, average annual, 1999–2001. [CRUDE (unadjusted) estimates with age-adjusted totals. Companion to Series 10, No. 219. INTERNET RELEASE ONLY.]

[Table 4.5.](#) Percent of current cigarette smokers 18 years of age and over who tried to quit smoking in the past year, by current smoking status and selected characteristics: United States, average annual, 1999–2001. [CRUDE (unadjusted) estimates with age-adjusted totals. Companion to Series 10, No. 219. INTERNET RELEASE ONLY.]

[Table 5.1.](#) Percent of adults 18 years of age and over who were physically inactive during their leisure time, and percent of adults 18 years of age and over who engaged in at least some physical activity for at least 10 minutes per episode, by selected characteristics: United States, average annual, 1999–2001 [CRUDE (unadjusted) estimates with age-adjusted totals. Companion to Series 10, No. 219. INTERNET RELEASE ONLY.]

Table 5.2. Percent distributions of times per week engaged in light-moderate leisure-time physical activity for adults 18 years of age and over, by selected characteristics: United States, average annual, 1999–2001. [CRUDE (unadjusted) estimates with age-adjusted totals. Companion to Series 10, No. 219. INTERNET RELEASE ONLY.]

Table 5.3. Percent distributions of times per week engaged in vigorous leisure-time physical activity for adults 18 years of age and over, by selected characteristics: United States, average annual, 1999–2001. [CRUDE (unadjusted) estimates with age-adjusted totals. Companion to Series 10, No. 219. INTERNET RELEASE ONLY.]

Table 5.4. Percent of adults 18 years of age and over who engaged in regular leisure-time physical activity, by type of activity and selected characteristics, United States, average annual, 1999–2001. [CRUDE (unadjusted) estimates with age-adjusted totals. Companion to Series 10, No. 219. INTERNET RELEASE ONLY.]

Table 5.5. Percent of adults 18 years of age and over who engaged in any leisure time strengthening activities, by selected characteristics: United States, average annual, 1999–2001. [CRUDE (unadjusted) estimates with age-adjusted totals. Companion to Series 10, No. 219. INTERNET RELEASE ONLY.]

Table 6.1. Percent of adults 18 years of age and over who were overweight, by selected characteristics: United States, average annual, 1999–2001. [CRUDE (unadjusted) estimates with age-adjusted totals. Companion to Series 10, No. 219. INTERNET RELEASE ONLY.]

Table 6.2. Percent distributions of body weight status for adults 18 years of age and over, by selected characteristics: United States, average annual, 1999–2001. [CRUDE (unadjusted) estimates with age-adjusted totals. Companion to Series 10, No. 219. INTERNET RELEASE ONLY.]

Table 7.1. Percent of adults 18 years of age and over who engaged in selected unhealthy behaviors, by selected characteristics: United States, average annual, 1999–2001. [CRUDE (unadjusted) estimates with age-adjusted totals. Companion to Series 10, No. 219. INTERNET RELEASE ONLY.]

Table 7.2. Percent of adults 18 years of age and over who engaged in selected healthy behaviors, by selected characteristics: United States, average annual, 1999–2001. [CRUDE (unadjusted) estimates with age-adjusted totals. [Companion to Series 10, No. 219. INTERNET RELEASE ONLY.]

Table X. Number of adults 18 years of age and over, by selected characteristics: United States, average annual, 1999–2001. [Companion to Series 10, No. 219. INTERNET RELEASE ONLY.]

Table 3.1. Percent distributions of lifetime alcohol drinking status for adults 18 years of age and over, by selected characteristics: United States, average annual, 1999–2001

[CRUDE (unadjusted) estimates, with age-adjusted totals. Companion to Series 10, No. 219.]

*Figure does not meet standards of reliability or precision (see "Appendix I").

— Quantity zero.

¹Lifetime alcohol drinking status: Lifetime abstainer is less than 12 drinks in lifetime; former infrequent is 12 or more drinks in lifetime but less than 12 in 1 year, and none in past year; former regular is 12 or more drinks in 1 year but none in past year; current is 12 or more drinks in lifetime and 1 or more drinks in past year.

²Persons of other races and unknown race and ethnicity, unknown education, unknown poverty status, and unknown marital status are included in total.

³Estimates are age-adjusted to the 2000 U.S. standard population using age groups 18–44 years, 45–64 years, and 65 years and over.

⁴GED is General Educational Development high school equivalency diploma.

⁵Poverty status is based on family income and family size using the U.S. Census Bureau poverty thresholds for 1998, 1999, and 2000.

⁶MSA is metropolitan statistical area (see "Appendix II").

NOTES: Denominator for each percent distribution excludes persons with unknown lifetime drinking status. See "Appendix II" for definitions of terms.

Table 3.2. Percent distributions of current alcohol drinking status for adults 18 years of age and over, by selected characteristics: United States, average annual, 1999–2001

¹Current alcohol drinking status: Nondrinker is defined as no drinks in the past year (includes both former drinkers and lifetime abstainers); infrequent is defined as 12 or more drinks in lifetime and 1–11 drinks in past year; light is defined as 12 or more drinks in lifetime and 3 drinks or fewer per week; moderate is defined as more than 3 and up to 14 drinks per week for men and more than 3 and up to 7 drinks per week for women; heavier is defined as more than 14 drinks per week for men and more than 7 drinks per week for women.²Persons of other races and unknown race and ethnicity, unknown education, unknown poverty status, and unknown marital status are included in the total.³Estimates are age-adjusted to the 2000 U.S. standard population using age groups 18–44 years, 45–64 years, and 65 years and over.⁴GED is General Educational Development high school equivalency diploma.⁵Poverty status is based on family income and family size using the U.S. Census Bureau poverty thresholds for 1998, 1999, and 2000.⁶MSA is metropolitan statistical area (see "Appendix II").

NOTES: Denominator for each percent distribution excludes persons with unknown lifetime and unknown current drinking status. See "Appendix II" for definitions of terms.

Table 3.3. Percent of adults 18 years of age and over who had 5 or more drinks in 1 day at least once in the past year, and percent of adults 18 years of age and over who had 5 or more drinks in 1 day on at least 12 days in the past year, by selected characteristics: United States, average annual, 1999–2001

[CRUDE (unadjusted) estimates, with age-adjusted totals. Companion to Series 10, No. 219.]

* Figure does not meet standards of reliability or precision (see "Appendix I").

— Quantity zero.

¹Persons of other races and unknown race and ethnicity, unknown education, unknown poverty status, and unknown marital status are included in total.

²Estimates are age-adjusted to the 2000 U.S. standard population using age groups 18–44 years, 45–64 years, and 65 years and over.

³GED is General Educational Development high school equivalency diploma.

⁴Poverty status is based on family income and family size using the U.S. Census Bureau poverty thresholds for 1998, 1999, and 2000.

⁵MSA is metropolitan statistical area (see “Appendix II”).

NOTES: Question was asked only of current drinkers, but prevalence is shown here as percent of all adults. Denominator for each cell excludes person with unknown lifetime drinking status and/or unknown five or more drinks in 1 day. See “Appendix II” for definitions of terms.

Table 3.4. Percent of current drinkers 18 years of age and over who had five or more drinks in 1 day at least once in the past year, and percent of current drinkers 18 years of age and over who had 5 or more drinks in 1 day on at least 12 days in the past year, by selected characteristics: United States, average annual, 1999–2001

* Figure does not meet standards of reliability or precision (see "Appendix I").

— Quantity zero.

¹Persons of other races and unknown race and ethnicity, unknown education, unknown poverty status, and unknown marital status are included in total.

²Estimates are age-adjusted to the 2000 U.S. standard population using age groups 18–44 years, 45–64 years, and 65 years and over.

³GED is General Educational Development high school equivalency diploma.

⁴Poverty status is based on family income and family size using the U.S. Census Bureau poverty thresholds for 1998, 1999, and 2000.

⁵MSA is metropolitan statistical area (see "Appendix II").

NOTES: Denominator for each cell excludes persons with unknown lifetime drinking status, nondrinkers, and current drinkers with unknown information for five or more drinks in 1 day. See "Appendix II" for definitions of terms.

Table 4.1. Percent distributions of lifetime cigarette smoking status for adults 18 years of age and over, by selected characteristics: United States, average annual 1999–2001

* Figure does not meet standards of reliability or precision (see "Appendix I").

¹Lifetime cigarette smoking status: Never smoker: never smoked at all or smoked less than 100 cigarettes in lifetime; Former smoker: smoked at least 100 cigarettes in lifetime but did not smoke at time of interview; Current smoker: smoked at least 100 cigarettes in lifetime and currently smoked.²Persons of other races and unknown race and ethnicity, unknown education, unknown poverty status, and unknown marital status are included in the total.³Estimates are age-adjusted to the 2000 U.S. standard population using age groups 18–44 years, 45–64 years, and 65 years and over.⁴GED is General Educational Development high school equivalency diploma.

⁵Poverty status is based on family income and family size using the U.S. Census Bureau poverty thresholds for 1998, 1999, and 2000.

⁶MSA is metropolitan statistical area (see "Appendix II").

NOTES: Denominator for each percent distribution excludes persons with unknown smoking status. See "Appendix II" for definitions of terms.

Table 4.2. Percent distributions of current cigarette smoking status for adults 18 years of age and over, and mean number of cigarettes smoked in a day among current smokers 18 years of age and over, by selected characteristics: United States, average annual, 1999–2001

[CRUDE (unadjusted) estimates, with age-adjusted totals. Companion to Series 10, No. 219.]

* Figure does not meet standards of reliability or precision (see "Appendix I").

¹Persons of other races and unknown race and ethnicity, unknown education, unknown poverty status, and unknown marital status are included in the total.²Estimates are age-adjusted to the 2000 U.S. standard population using age groups 18–44 years, 45–64 years, and 65 years and over.³GED is General Educational Development high school equivalency diploma.⁴Poverty status is based on family income and family size using the U.S. Census Bureau poverty thresholds for 1998, 1999, and 2000.⁵MSA is metropolitan statistical area (see "Appendix II").

NOTES: Current cigarette smoking status: Nonsmoker includes never smokers and former smokers; Daily smokers: currently smoked everyday; Nondaily smokers: currently smoked some days, regardless of number of days they smoked. Denominator for each percent distribution excludes persons with unknown current smoking status. Denominators for mean number of cigarettes smoked in a day exclude smokers (daily and nondaily) with unknown number of cigarettes smoked and nondaily smokers who did not smoke in the past 30 days. Estimates reflect usual cigarette consumption on days smoked and do not reflect consumption over a period of time such as a week or a month. See "Appendix II" for definitions of terms.

Table 4.3. Percent distributions of usual number of cigarettes smoked in a day among all current cigarette smokers 18 years of age and over, by selected characteristics: United States, average annual, 1999–2001

* Figure does not meet standards of reliability or precision (see "Appendix I").

— Quantity zero.

¹Usual number of cigarettes smoked in a day includes the usual cigarette consumption of daily and nondaily smokers combined. Estimates for nondaily smokers reflect number of cigarettes smoked only on the days that they smoked and are limited to those who smoked at least once in the past 30 days.²Persons of other races and unknown race and ethnicity, unknown education, unknown poverty status, and unknown marital status are included in the total.³Estimates are age-adjusted to the 2000 U.S. standard population using age groups 18–44 years, 45–64 years, and 65 years and over.⁴GED is General Educational Development high school equivalency diploma.

⁵Poverty status is based on family income and family size using the U.S. Census Bureau poverty thresholds for 1998, 1999, and 2000.

⁶MSA is metropolitan statistical area (see "Appendix II").

NOTES: Denominator for each percent distribution excludes smokers with unknown number of cigarettes smoked. Estimates reflect usual cigarette consumption on days smoked and do not reflect average cigarette consumption over a period of time such as a week or a month. See "Appendix II" for definitions of terms.

Table 4.4. Percent distributions of age of smoking initiation among current cigarette smokers 18 years of age and over: United States, average annual, 1999–2001

* Figure does not meet standards of reliability or precision (see "Appendix I").

¹Persons of other races and unknown race and ethnicity, unknown education, unknown poverty status, and unknown marital status are included in the total.²Estimates are age-adjusted to the 2000 U.S. standard population using age groups 18–44 years, 45–64 years, and 65 years and over.³GED is General Educational Development high school equivalency diploma.⁴Poverty status is based on family income and family size using the U.S. Census Bureau poverty thresholds for 1998, 1999, and 2000.⁵MSA is metropolitan statistical area (see "Appendix II").

NOTES: Denominator for each percent distribution excludes current smokers with unknown age of smoking initiation. See "Appendix II" for definitions of terms.

*Figure does not meet standards of reliability or precision (see "Appendix I").

¹Engaged in no light-moderate or vigorous leisure-time physical activity lasting 10 minutes or longer per episode. Persons classified as physically inactive may include individuals who engaged in strengthening activities but no other type of physical activity.

²Includes vigorous leisure-time physical activities, lasting 10 minutes or longer per episode, that cause heavy sweating or large increases in breathing or heart rate and/or light-moderate leisure-time physical activities, lasting 10 minutes or longer per episode, that cause only light sweating or a slight to moderate increase in breathing or heart rate.

³Persons of other races and unknown race and ethnicity, unknown education, unknown poverty status, and unknown marital status are included in the total.

⁴Estimates are age-adjusted to the 2000 U.S. standard population using age groups 18–44 years, 45–64 years, and 65 years and over.

⁵GED is General Educational Development high school equivalency diploma.

⁶Poverty status is based on family income and family size using the U.S. Census Bureau poverty thresholds for 1998, 1999, and 2000.

⁷MSA is metropolitan statistical area (see "Appendix II").

NOTES: Denominator for each percent excludes persons with unknown leisure-time physical activity status. See "Appendix II" for definitions of terms.

* Figure does not meet standards of reliability or precision (see "Appendix I").

– Quantity zero.

¹Light-moderate activity: Leisure-time physical activities that cause only light sweating or a light to moderate increase in breathing or heart rate and are done for at least 10 minutes per episode.²None: Persons classified as not doing light-moderate activity may include individuals who engaged in vigorous activity but did not engage in light-moderate activity.³"Less than 1" refers to frequencies of light-moderate activities lasting at least 10 minutes per episode that occurred less than one time per week (for example, three times per month).⁴Persons of other races and unknown race and ethnicity, unknown education, unknown poverty status, and unknown marital status are included in the total.⁵Estimates are age-adjusted to the 2000 U.S. standard population using age groups 18–44 years, 45–64 years, and 65 years and over.

⁶GED is General Educational Development high school equivalency diploma.

⁷Poverty status is based on family income and family size using the U.S. Census Bureau poverty thresholds for 1998, 1999, and 2000.

⁸MSA is metropolitan statistical area (see "Appendix II").

NOTES: Denominator for each percent distribution excludes persons with unknown light-moderate leisure-time physical activity status. See "Appendix II" for definitions of terms.

Table 5.3. Percent distributions of times per week engaged in vigorous leisure-time physical activity for adults 18 years of age and over, by selected characteristics: United States, average annual, 1999–2001

* Figure does not meet standards of reliability or precision (see "Appendix I").

¹Vigorous activity: Leisure-time physical activities that cause heavy sweating or a large increases in breathing or heart rate and are done for at least 10 minutes per episode.²None: Persons classified as not doing vigorous activity may include individuals who engaged in light-moderate activity but did not engage in vigorous activity.³"Less than 1" refers to frequencies of vigorous activities lasting at least 10 minutes per episode that occurred less than one time per week (for example, three times per month).⁴Persons of other races and unknown race and ethnicity, unknown education, unknown poverty status, and unknown marital status are included in the total.⁵Estimates are age-adjusted to the 2000 U.S. standard population using age groups 18–44 years, 45–64 years, and 65 years and over.

⁶GED is General Educational Development high school equivalency diploma.

⁷Poverty status is based on family income and family size using the U.S. Census Bureau poverty thresholds for 1998, 1999, and 2000.

⁸MSA is metropolitan statistical area (see "Appendix II").

NOTES: Denominator for each percent distribution excludes persons with unknown vigorous leisure-time physical activity status. See "Appendix II" for definitions of terms.

Table 5.4. Percent of adults 18 years of age and over who engaged in regular leisure-time physical activity, by type of activity and selected characteristics: United States, average annual, 1999–2001

*Figure does not meet standards of reliability or precision (see "Appendix I").

¹Strengthening activities: Leisure-time physical activities specifically designed to strengthen muscles such as weight lifting or calisthenics. No minimum duration imposed when asking frequency and no duration question asked.²Persons of other races and unknown race and ethnicity, unknown education, unknown poverty status, and unknown marital status are included in the total.

³Estimates of age-adjusted to the 2000 U.S. standard population using age groups 18–44 years, 45–64 years, and 65 years and over.

⁴GED is General Educational Development high school equivalency diploma.

⁵Poverty status is based on family income and family size using the U.S. Census Bureau poverty thresholds for 1998, 1999, and 2000.

⁶MSA is metropolitan statistical area (see “Appendix II”).

NOTES: Denominator for each percent excludes persons with unknown strengthening activity status. See “Appendix II” for definitions of terms.

Table 6.1. Percent of adults 18 years of age and over who were overweight, by selected characteristics: United States, average annual, 1999–2001

* Figure does not meet standards of reliability or precision (see "Appendix I").

– Quantity zero.

¹Body weight status was based on Body Mass Index (BMI) using self-reported height and weight. The formula for BMI is kilograms/meters². Underweight is defined as a BMI of less than 18.5; healthy weight is defined as a BMI of greater than or equal to 18.5 and less than 25; overweight, but not obese, is defined as a BMI of greater than or equal to 25 and less than 30; and obese is defined as a BMI of greater than or equal to 30.²Persons of other races and unknown race and ethnicity, unknown education, unknown poverty status, and unknown marital status are included in the total.

³Estimates are age-adjusted to the 2000 U.S. standard population using age groups 18–44 years, 45–64 years, and 65 years and over.

⁴GED is General Educational Development high school equivalency diploma.

⁵Poverty status is based on family income and family size using the U.S. Census Bureau poverty thresholds for 1998, 1999, and 2000.

⁶MSA is metropolitan statistical area (see “Appendix II”).

NOTES: Denominator for each percent distribution excludes persons with unknown BMI. See “Appendix II” for definitions of terms.

* Figure does not meet standards of reliability or precision (see "Appendix I").

¹Five or more drinks in 1 day at least once in the past year was asked of only current drinkers but estimates reflect percent of all adults who engaged in this behavior (as shown in table 3.3).²Smoked at least 100 cigarettes in lifetime and currently smoked.³Never engaged in any light, moderate, or vigorous leisure-time physical activity.⁴Obese is defined as a body mass index (BMI) greater than or equal to 30.

⁵Persons of other races and unknown race and ethnicity, unknown education, unknown poverty status, and unknown marital status are included in total.

⁶Estimates are age-adjusted to the 2000 U.S. standard population using age groups 18–44 years, 45–64 years, and 65 years and over.

⁷GED is General Educational Development high school equivalency diploma.

⁸Poverty status is based on family income and family size using the U.S. Census Bureau poverty thresholds for 1998, 1999, and 2000.

⁹MSA is metropolitan statistical area (see "Appendix II").

NOTES: Denominator for each percent excludes persons with unknown health behavior characteristic. See "Appendix II" for definitions of terms.

Table 7.2 Percent of adults 18 years of age and over who engaged in selected healthy behaviors, by selected characteristics: United States, average annual, 1999–2001

[CRUDE (unadjusted) estimates, with age-adjusted totals. Companion to Series 10, No. 219.]

* Figure does not meet standards of reliability or precision (see "Appendix I").

¹Estimates for adults who did not have five or more drinks in 1 day were calculated for this table only and are not shown elsewhere in the report. The question asking about having five or more drinks in 1 day in the past year was asked only of current drinkers but the estimates shown here reflect the percent of all adults who engaged in this behavior.²Never smoked cigarettes or smoked fewer than 100 cigarettes in lifetime.

³Engaging in light-moderate activity at least 5 times per week for at least 30 minutes each time or engaging in vigorous activity at least 3 times per week for at least 20 minutes each time or meeting either criterion or both criteria.

⁴Healthy weight is defined as a BMI greater than or equal to 18.5 and less than 25.

⁵Persons of other races and unknown race and ethnicity, unknown education, unknown poverty status, and unknown marital status are included in total.

⁶Estimates are age-adjusted to the 2000 U.S. standard population using age groups 18–44 years, 45–64 years, and 65 years and over.

⁷GED is General Educational Development high school equivalency diploma.

⁸Poverty status is based on family income and family size using the U.S. Census Bureau poverty thresholds for 1998, 1999, and 2000.

⁹MSA is metropolitan statistical area (see “Appendix II”).

NOTES: Denominator for each percent excludes persons with unknown health behavior characteristic. See “Appendix II” for definitions of terms.

Table X. Number of adults 18 years of age and over, by selected characteristics: United States, average annual, 1999–2001

[CRUDE (unadjusted) estimates, with age-adjusted totals. Companion to Series 10, No. 219.]
