

Hemovigilance Module: Reporting zero incidents or adverse events

Report zero adverse reactions or incidents using the Monthly Reporting Denominators form if none occur during a reporting month.

1

Access the Monthly Reporting Denominator form by selecting 'Denominator' from the tab and then 'Add'.

2

Select 'No Adverse Reactions reported this month' if no adverse reactions defined in the NHSN HV Module protocol occurred.
Note: This box will be disabled if an adverse reaction defined in the NHSN HV Module protocol was entered during the month.

3

Select 'No Incidents reported this month' if no incidents occurred that met incident criteria defined in the NHSN HV Module Protocol.
Note: This box will be disabled if a Detailed Incident form was entered for the month.

Add Monthly Reporting Denominators

Mandatory fields marked with *

*Facility ID:

*Month:

*Year:

☐ No Adverse Reactions reported this month ☐ No Incidents reported this month

Product		*Units Transfused	*Aliquots Transfused	*Total Discards
Whole Blood	TOTAL			
Red blood cells	Whole blood derived			
	TOTAL			

Important Tips

- Facilities can report zero adverse events directly from the **Incomplete/Missing Lists (Alerts tab)** by checking the appropriate boxes. Refer to the [Component Alerts](#) Quick Reference Guide for an outline of these steps.
- However, the boxes cannot be checked if a **Monthly Reporting Denominators** form has not been completed for the month. -The zero adverse events boxes should not be used to indicate that a facility did not perform surveillance during the month.
